

POWER INTERRUPTION IN WESTERN KENYA

Kenya Power is in the process of upgrading its IT-based supervisory and control system (SCADA system) that will go along way in improving service delivery to our customers. The upgraded SCADA system will provide real time electric power system data and enable full remote monitoring and control of the entire high voltage transmission grid network from a centralized Control Centre.

As a result, the Company will interrupt electricity to the below mentioned areas in West Kenya and adjacent areas on Monday 20th February, 2012 between 8.00 a.m. and 4.00.p.m.

Kenya Power regrets the inconveniences that will be caused during the operation.
